KINGMAN MERCANTILE CO.

Mohave County Miner, Published Every Saturday.

RATES OF SUBSCRIPTION:
One year, strictly in advance, : 3 00\$
Six months, : : : 1 75
Three months : : : 1 00
Advertising rates on application.

Local and Personal

TO THE PUBLIC.

The MINER is not represented
by agent or otherwise within or
without Mohave County. All
orders issued on this office are
void.

The Moderns initiated three new
members at their last meeting, Thurs-
day evening.

Mrs. Mabel Blakely returned from
Signal last Saturday. She was accom-
panied by her sister.

James Twigg has moved his family
into the residence of F. L. Smith, on
South Front street.

H. J. Delamer has gone to Temple
Bar to look after affairs of the Temple
Bar Con. Mining Company.

L. Lentzinger now handles the
thrill on the Utah flyer. He is a
most capable engineer.

Andy Suffer has returned from Cedar
where he has been doing assess-
ment work on a mining claim.

Mrs. George M. Bowers arrived from
Pasadena yesterday morning and will
visit with her husband for a few weeks.

L. Kimberly has completed his as-
sessment work on a mining claim in
the San Francisco mining district and
has gone to Stockton Hill.

T. J. Grant and John Smithline came
over from Chloride Saturday last and
have been enjoying metropolitan life
in Kingman all the week.

Thomas McNeely went out to his
mining property on Sherum's Peak
last Monday with a mining man who
desires investment in the county.

Judge W. G. Blakely and son Lew,
accompanied by Mr. Sterry, of Los An-
geles, have gone to Aubrey to look af-
ter affairs of the Midas Mining Com-
pany.

Mr. and Mrs. Mose Levy came up
from Signal last Saturday and have
gone to San Francisco. Mr. Levy will
return to Signal as soon as he gets his
family comfortably settled in the city.

Last night the Kingman lodge of
Elks had a drawing for a life member-
ship in the order. George Hoyt was
the lucky one. The funds raised by
the sale of a life membership go to the
building fund. So far nearly 1,000\$
have been raised in this manner.

We have received inquiries as to the
whereabouts of John James Conway
and wife Eliza Jane. They are sup-
posed to have left Prescott for King-
man fourteen years ago. Any one
knowing of the parties or their where-
abouts will confer a favor by commu-
nicating the same to this office.

The Pioneer Symphony Club will
give the entertainment which was
postponed on account of sickness of
several of the members, on next Sat-
urday evening. Tickets for the enter-
tainment will be on sale in a few days.
The musical program will embrace
many delightful numbers and should
not be missed by the music loving
public.

Harry F. Williams has been wiring
up the Hotel Beal this week, prepara-
tory to the opening of that magnificent
hostelry within the next few weeks.
Every room in the house will be elec-
trically connected with the office.
Bath rooms for the convenience of
guests are connected with all rooms en
suite. No hotel on the line of the
Santa Fe road between Denver and
Los Angeles can compare with it for
convenience and comfort.

Mrs. J. T. Pendergast has returned
from an extended visit to San Fran-
cisco.

Steve Mott will soon have a mill in
operation near the mouth of Burro
creek.

Bring in your ores and make the dis-
play at Los Angeles one of the best the
county has ever sent out.

The Mexican who was injured in one
of the White Hills mines last week
died from the effects of his injuries
late Saturday evening.

J. C. Crocker, of Bakersfield, Cal., a
brother-in-law of James A. Smith, is in
Mohave county for the purpose of pur-
chasing all the available cattle for
shipment to his California ranch.

J. N. Cohenour and Peter White have
gone to the Big Bend of the Colorado
river, where Mr. Cohenour has a num-
ber of valuable copper claims. They
will be gone several weeks.

Ed. Imus, chairman of the board of
supervisors, is in Kingman for the pur-
pose of signing the Chloride school
bonds and settling up a number of
matters that the board of supervisors
have been wrestling with for some time
past.

The Midas Mining company has lo-
cated a mill site on the Big Sandy,
within a short distance of its mines in
Aubrey district. A mill will be erected
on the site in the near future of suffi-
cient capacity to handle all ores pro-
duced by the mines.

It is the impression of many people
that the mines of Gold and Lost Basins
will soon be taken in hand and operat-
ed on a large scale. Many of the mines
are but a short distance from the Colo-
rado river and the only drawback is a
lack of fuel. With electrical power all
difficulties would be surmounted.

A great body of lead ore has been
struck in the old Wheeler mine in
Wallapai mountain. The mine is now
owned by Charles Metcalfe and Thomas
Tyrrell. The wagon road to the moun-
tain now runs quite close to the prop-
erty, and but a small amount of work
is necessary to complete it. The mine
will be shipping ore within the next
three months unless snow interferes
with the operation of the mine.

The samples of ore from W. H. Lake's
General Lawton group of mines prove
to be very rich in gold. One sample
from four feet of ore gave a return of
four ounces in gold, while the other
samples from other mines of the group
gave equally as good returns. The
mines are situated about six miles
from the Colorado river and about ten
miles west of the White Hills. Mr.
Lake will probably put in a mill on the
river to handle his ore some time this
coming summer.

Seats for the Louise Brehany opera
are now on sale at Pendergast's drug
store. The opera is one of the most
enjoyable the people of Kingman have
been called on to favor with their pat-
ronage. Miss Brehany is a magnificent
soprano, with a voice of wide range and
power. Every one of the company has
some pleasing specialty, but Miss
Brehany in her charming little ballads
outdoes them all. Be sure to get your
seats reserved in time or you may not
be able to get a choice. Remember the
date—February 22d.

Frank Cofer, of the Big Sandy, was
in Kingman a few days ago. He is of
the opinion that the Big Sandy country
is on the verge of a big boom. The
Sandy country has natural advantages
in the way of water and wood that
ought to make it an ideal mining sec-
tion. Besides these natural advanta-
ges it has moderately large bodies of
good grade milling ore, the values of
which are in gold.

LOST—In Kingman; Waltham hunting
case, gold filled, watch. Finder
will return to P. A. Beebe and re-
ceive reward.

Mohave County's Mineral Exhibit.

Monday next it is the intention of
G. W. Beecher and A. H. Smith, who
have been appointed to represent Mo-
have county, to begin the collection of
mineral specimens for exhibit at the
Mineral and Citrus Exposition, to be
held in Los Angeles from the 19th of
February to the 10th of March. There
is little time to spare and what has to
be done must be done at once. Cir-
culars have been sent to mine owners
which should be filled out and re-
turned at once. These circulars when
properly filled out will contain data
from which a pamphlet descriptive of
the mines will be made up. Every one
who can spare a specimen from his
mine should send it in at once, and in
doing so please attach a statement giv-
ing the name of the mine, owner and
locality. Mohave county should have
a splendid exhibit at this Exposition
and to do so the co-operation of every
mine owner in the county is necessary.

Mrs. Charles Sangster died at her
home in Chloride last Sunday. She
had been ill but about a week but her
illness was so severe from the start
that but little hope was entertained of
her recovery. Her remains were taken
to Los Angeles last Monday for burial
and were accompanied by the bereaved
husband and other relatives of the de-
ceased. Mrs. Sangster was a most es-
timable woman and her death is a ter-
rible blow to a loving husband and
broken-hearted parents.

G. W. Beecher visited Stockton Hill
this week and reports considerable ac-
tivity in all the mines of that section.
Robert Gray has good ore in several of
his mines and will soon be shipping
regularly to the smelters. Peter Caf-
fery has opened up a nice body of lead
ore in the Vigilant and will soon have a
carload on the dump. The ore is im-
proving with every foot the tunnel is
driven into the mountain. The ledge
is now wider than the tunnel and
fairly well mineralized.

Dr. R. B. Knight and wife came in
from White Hills last Monday and
after visiting with Kingman friends for
a day departed for Stockton, Cal., Tues-
day afternoon. Mr. and Mrs. Knight
have resided in Mohave county for a
number of years and we hope they will
be induced to again take up their re-
sidence here. The best wishes of a large
circle of friends go with them to their
new home.

The tunnel being run to cut the De la
Fontaine vein at Stockton Hill is now
within the ore zone and it is expected
that the big ore chute will be cut with
in a few weeks. In the lower workings
the great lead body is still intact. A
drift will be driven to the eastward on
the ore and a big back of ground
blocked out.

A cyanide plant will soon be in op-
eration on the tailings of the Mocking
Bird mine. When the tailings have
been worked up the mill will be put in
operation and the cyanide treatment
given all ores milled. The mine is one
of the best in the district bordering on
the river.

Henry Lovin and Walter Hallmore
this week sold to Ira W. Hawkins their
interest in a number of mining claims
between the Sheeptail mines and the
Colorado river, for which they received
\$5,000 in cash. Mr. Hawkins will at
once proceed to develop the claims.

Dr. Fred. Waite

DENTIST.....

Permanently located at Kingman, Ariz.

Will be in Chloride from the 10th
to the 15th of each month.

CROWN
and BRIDGE WORK

.....a specialty

All work guaranteed.

Office: GADDIS & PERRY B'D'G.

Died from His Wounds.

Thomas Ryan, who was stabbed at
Chloride Friday evening of last
week, died from the effect of his
wounds Saturday evening. On his
death bed he exonerated the man who
stabbed him from all blame, stating
that he had committed an unprovoked
assault on the man and that the stab-
bing was the result. Tuesday Alex.
McKenzie, who confessed to having
done the stabbing, had a preliminary
hearing before Justice Brakeman and
was discharged. The account of the
stabbing as related to us, would not
bear out the theory that Mr. McKen-
zie was altogether justified in taking
the life of a human being; that at the
time of the stabbing he was in no im-
mediate danger. From the statement
at hand we glean that Ryan went into
the saloon of J. C. Wilson, on that fa-
tal night, and assaulted McKenzie.
The barkeeper proceeded to eject Ry-
an from the place and while he was
held McKenzie stabbed him in several
places in the abdomen, but at the time
no one gave the matter a thought as it
was not supposed he was hurt. The
doctor stated at the coroner's inquest
that the knife had been driven into the
body with such force that one rib had
been almost severed and that the knife
had been turned in the wound.

The taking of human life is a serious
matter and the time is at hand when a
stop must be put to indiscriminate
killings. In the case of the killing of
Ryan the grand jury ought to look
carefully into the matter and if the
crime was not committed in necessary
defense of his life McKenzie ought to
be severely dealt with.

Ira W. Hawkins has sold to the Ne-
vada and New England Mining Com-
pany a group of mining claims on the
Nevada side of the Colorado river,
near the Homestake, for which he re-
ceives 20,000\$. A part payment has
been made on the purchase and the
balance in a few months. The claims
are said to be of the same general char-
acter as the Homestake and equally as
rich. Mr. Hawkins has resided on the
Colorado river for a number of years
and has secured many valuable mining
claims.

Indian Agent Ewing has let a con-
tract for a large building at the Indian
school at Hackberry to be used as a
residence by the matron. Brick for
the building is now being burned and
the work on the building will be com-
menced shortly. The big school build-
ing will probably be built out of brick
burned on the ground.

George M. Bowers is having some
work done on the Primarosa mine,
Todd Basin. A splendid ore body has
been opened up and shipments will
soon be made to the smelters. The
ore is rich in both gold and silver.

After the election of officers of the
Arizona & Utah railroad company,
which takes place in New York on
March 14th, it is believed that an ef-
fort will be made to extend the line to
a connection with the Utah & Pacific.

Last Monday the Mr. Plaster of Par-
is company played to a full house in
Kingman. The company is one of the
best Kingman has seen for years, and
we commend it to the theater-going
public as worthy their best patronage.

Will Walker this week brought to
Kingman samples of rock from a new
find in the Buck mountains, near Fran-
conia. The rock horns well in gold.

The Appetite of a Goat

Is envied by all poor dyspeptics
whose stomach and liver are out of
order. All such should know that Dr.
King's New Life Pills, the wonderful
stomach and liver remedy, gives a
splendid appetite, sound digestion and
a regular bodily habit that insures per-
fect health and great energy. Only
25c at Watkins' drugstore.

Glorious News

Comes from Dr. D. B. Cargile, of
Washita, I. T. He writes: "Four bot-
tles of Electric Bitters has cured Mrs.
Brewer of scrofula, which had caused
her great suffering for years. Terrible
sores would break out on her head and
face, and the best doctors could give
no help; but her cure is complete and
her health is excellent." This shows
what thousands have proved, that
Electric Bitters is the best blood puri-
fier known. It's the supreme remedy
for eczema, tetter, salt rheum, ulcers,
boils and running sores. It stimulates
liver, kidneys and bowels, expels pois-
ons, helps digestion, builds up the
strength. Only 50 cents. Sold by H.
H. Watkins, Druggist. Guaranteed.

A. G. Grossman, of the Coarse Gold
Mining Company, came up from the
placers on the west side of Cheme-
huevis mountain last Saturday even-
ing. He reports that gold has been
found in the deep gravel on the com-
pany's claims about four miles from
the river. The gold is very fine, but
bedrock has not yet been reached. The
claims extend from the mountain to
the river, a distance of about eight
miles. In the upper part of the ground
the gold is very coarse, but water is
not to be had at the mines and no
work can be done without water, as the
gravel is softly cemented together, and
will have to be run through sluice
boxes to separate the gold from its
matrix.

Mrs. H. H. Watkins has gone to Los
Angeles for a few days' outing.

Redemption of County Warrants.

OFFICE OF THE TREASURER,
OF MOHAVE COUNTY, ARIZONA.

All County warrants not
paid, from number 279 to 380
inclusive, will be paid at the
office of the County Treasur-
er in Kingman, Wednesday,
February 7th, 1900.

The interest on all the
above warrants will cease
after that date

A. CORNWALL,

For information apply to this of-
fice.

FOR SALE....

The best washing machine ever
brought to Mohave county and the
best machine made.

J. W. EMERSON.

Mine Warning Notice.

TO WHOM IT MAY CONCERN:
Notice is hereby given that the San Francisco
mine, situated in Cedar Valley mining dis-
trict, Mohave county, Arizona, with milling
and other machinery thereon, is the property
of the undersigned, and the mine, machinery,
nor the owner, thereof will be responsible for
any loss or debts contracted, nor is justice sus-
tained by any person or persons employed or
working on said property; and that no party
holding a bond for deed or escrow agreement
for the transfer of said property is the agent of
the owners for any purpose whatever, and that
all operatives and laborers engage in such ser-
vice at their own risk, and that no debt or claim
of debt is valid against said mine or its owners.
A. VER MEHR,
LIBURCIO PADILLA
Kingman, Arizona, January 27, 1900.
